lists and catalogues have been en vogue in philosophy cultural media and literary studies for more than a decade these explorations of enumerative modes however have not yet had the impact on classical scholarship that they deserve while they routinely take a limited set of ancient models as their starting point there is no comparably comprehensive study that focuses on antiquity conversely studies on lists and catalogues in classics remain largely limited to individual texts and with some notable exceptions offer little in terms of explicit theorising the present volume is an attempt to close this gap and foster the dialogue between the recent theoretical re appraisal of enumerative modes and scholarship on ancient cultures the 16 contributions to the volume juxtapose literary forms of enumeration with an abundance of ancient non sub or para literary practices of listing and cataloguing in their different approaches to this vast and heterogenous corpus they offer a sense of the hermeneutic epistemic and methodological challenges with which the study of enumeration is faced and

elucidate how pragmatics materiality performativity and aesthetics are mediated in lists and catalogues
