historians have not convincingly explained modern capitalism s two major economic crises the great depression of the

1930s and the global financial crisis gfc of 2008 2009 accounting for crises offers a new explanation why both began and were more severe in the usa america based on an accounting interpretation of marx s theory of crises it explains their origins in capitalists control of accumulation which reveals important overlooked roles for irving fisher s accounting theory this theory by allowing discretion in accounts in the context of falling rates of profit encouraged swindling overstating reported profits and understating their risk which facilitated and aggravated both crises framed by fisher s theory during the 1920s american accounting theorists justified discretion which creating the big mess the companion volume concluded it management used to conservatively smooth earnings accounting for crises shows that fisher s theory also underlays the popular new theory of investment that justified valuing shares using reported earnings which encouraged their manipulation and legitimized speculation this it argues underlays america s exceptional late 1920s stock market boom the 1929 great crash and the depth and length of its great depression prominently associated with the boom fisher became unpopular after the crash his name disappearing from public debate nevertheless the book concludes his theory hindered economic recovery weakened 1930s reforms undermined accounting regulation from the late 1930s and following his rehabilitation from the late 1950s underlies the financial accounting standards board s conceptual framework which by allowing off balance sheet accounting for securitization spes fostered the 2007 credit crunch that triggered the 2008 2009 global financial crisis gfc

the adoption by the accounting standards board of its statement of principles for financial reporting in december 1999 means that we now have an authoritative conceptual framework which should govern the production of british financial statements yet while the text of the statement is directed at members of the accounting profession students of accounting will need to understand the framework and its repercussions an introduction to modern financial reporting theory explains the content of the statement in an accessible language specifically for the student of accounting and finance this text will be of direct and practical interest to students who need to understand the contents of the new framework which helps to explain why and how financial reporting is carried out why financial statements are prepared in the way that they are why accounting standards specify one method rather than another how the methods specified by accounting standards relate to each other how practice has developed and will continue to develop brian rutherford emphasizes and enlarges on the key features of the framework provides many more examples shows how the framework applies in practice and also offers some criticisms of its content the book clarifies to students why various methods and practices in accounting have evolved while illustrating how they relate to each other and to the underlying function of financial reporting this text will be essential reading on university and professional courses in advanced financial accounting particularly courses on accounting theory and financial reporting brian rutherford is professor of accounting at canterbury business school university kent at canterbury
